Alexandre Vanhoutte

SENIOR BACKEND ENGINEER

Backend · Data Systems · Seoul, South Korea

PROFILE

Senior Backend Engineer with 7 years of experience building APIs, data-processing systems, and backend services. Strong background in Go, PostgreSQL, time-series data, and performance optimization, with experience developing cloud-native solutions for carbon accounting and industrial software.

PROFESSIONAL EXPERIENCE

Glassdome — Oct 2024 – Oct 2026
Backend Engineer — Seoul, South Korea

- Build Go backend services and REST and gRPC APIs, working with product and frontend teams to deliver carbon accounting and industrial performance features.
- Design calculation, aggregation, and time-series processing workflows for carbon accounting and OEE.
- Optimized TimescaleDB queries, reducing one-year industrial data retrieval time from over 30 seconds to around 5 seconds.
- Contribute to multi-tenant authentication and authorization, including OIDC and SAML integrations.
- Contribute to an MCP feature for creating and exploring carbon models.
- Use Kubernetes, GitHub Actions, Argo CD, and Grafana to deploy, monitor, and troubleshoot backend services in production.

Qwerky — Nov 2021 – Oct 2024
Lead Backend Engineer — Seoul, South Korea

- Built and maintained NestJS backend services in TypeScript, including GraphQL APIs for web and mobile applications.
- Led backend architecture and API design, drove technical decisions, and reviewed code across the backend team.
- Implemented search features with Elasticsearch, including indexing and search queries.
- Developed backend features for authentication, secure handling of sensitive user data, and payments.
- Managed production deployments on AWS and introduced regression tests and deployment checks, reducing deployment-related incidents by 40%.

Mobile OS — Oct 2019 – Nov 2021
Software Engineer — Seoul, South Korea

- Built REST APIs for Korean news search and business-data analysis and developed an internal Korean NLP library for lemmatization and part-of-speech tagging.
- Centralized reusable internal libraries and improved release workflows for production data-processing services.

Capgemini — Mar 2018 – Sep 2018
DevOps Engineer Intern — Lille, France

- Automated health checks, centralized logging, and consolidated ticketing workflows across internal services.

Vekia — Apr 2016 – Jul 2016; Sep 2017 – Feb 2018
Backend Developer Intern — Lille, France

- Developed Java inventory tools and shared test utilities.
- Built an AngularJS interface to visualize sales and support stock-allocation decisions.

EDUCATION

Epitech — Master's Degree, Computer Programming · 2013 – 2018
Keimyung University — IT Studies · 2016-17 | Korean Language Studies · 2018-19

OPEN TO...

Senior Backend Engineer roles in South Korea, particularly opportunities involving backend architecture, data systems, and distributed systems.

TECHNICAL SKILLS

BACKEND
Go · TypeScript (NestJS) · Node.js · REST · GraphQL · gRPC · API design

DATA
PostgreSQL · TimescaleDB · Elasticsearch · Neo4j · Redis

PLATFORM & OBSERVABILITY
AWS · Kubernetes · Docker · GitHub Actions · Argo CD · Grafana

EVENT STREAMING & WORKFLOWS
Redpanda · Temporal

ENGINEERING FOCUS
Calculation workflows · Time-series processing · Distributed systems · Performance optimization

LANGUAGES

FRENCH
Native

ENGLISH
Professional working proficiency

KOREAN
Basic · Currently studying

ADDITIONAL

Driving licenses: France and South Korea
