

Alexandre Vanhoutte

SENIOR BACKEND ENGINEER

Backend · Data Systems · Seoul, South Korea

PROFILE

Backend engineer with 6+ years of experience building APIs and data-processing systems. I work mainly with Go, PostgreSQL, and Kubernetes, and I have also used TypeScript and GraphQL in production. My recent work focuses on calculation workflows, time-series data, multi-tenant systems, and backend performance.

PROFESSIONAL EXPERIENCE

Glassdome

Backend Engineer

Oct 2024 - Present

Seoul, South Korea

- Build Go backend services and REST and gRPC APIs, working with product and frontend teams to deliver carbon accounting and industrial performance features.
- Design calculation, aggregation, and time-series processing workflows for carbon accounting and OEE.
- Optimized TimescaleDB queries, reducing one-year industrial data retrieval time from over 30 seconds to around 5 seconds.
- Contribute to multi-tenant authentication and authorization, including OIDC and SAML integrations.
- Contributed to an MCP feature that helps users create carbon models.
- Use Kubernetes, GitHub Actions, and ArgoCD to deploy backend services and troubleshoot issues in issues.

Qwerky

Lead Backend Engineer

Nov 2021 – Oct 2024

Seoul, South Korea

- Built and maintained NestJS backend services in TypeScript, including GraphQL APIs for web and mobile applications.
- Contributed to backend architecture and API design, reviewed code, and helped make technical decisions.
- Implemented search features with Elasticsearch, including indexing and search queries.
- Developed secure backend features for authentication, sensitive user data, and payments.
- Managed production deployments on AWS and introduced regression tests and deployment checks, reducing deployment-related incidents by 40%.

Mobile OS

Software Engineer

Oct 2019 - Nov 2021

Seoul, South Korea

- Built REST APIs for Korean news search and business-data analysis and developed an internal Korean NLP library for lemmatization and part-of-speech tagging.
- Centralized reusable internal libraries and improved release workflows for production data-processing services.

Capgemini

DevOps Engineer - Intern

Mar 2018 - Sep 2018

Lille, France

- Automated health checks, centralized logging, and consolidated ticketing workflows across internal services.

Vekia

Backend Developer Intern

Apr 2016 – Jul 2016; Sep 2017 – Feb 2018

Lille, France

- Developed Java inventory tools and shared test utilities.
- Built an AngularJS interface to visualize sales and support stock-allocation decisions.

EDUCATION

Epitech

Keimyung University

Master's Degree, Computer Programming · 2013 - 2018

IT Studies · 2016–17 | Korean Language Studies · 2018–19

Work Authorization: Authorized to work in South Korea. Visa sponsorship not required

OPEN TO...

Senior backend roles in South Korea, especially with product teams building backend platforms, data systems, or industrial software.

TECHNICAL SKILLS

BACKEND

Go · TypeScript (NestJS) · Node.js · REST · GraphQL · gRPC · API design

DATA

PostgreSQL · TimescaleDB · Elasticsearch · Neo4j · Redis

PLATFORM & OBSERVABILITY

AWS · Kubernetes · Docker · GitHub Actions · ArgoCD · Grafana

EVENT STREAMING & WORKFLOWS

Redpanda · Temporal

ENGINEERING FOCUS

Microservices · distributed systems · system design · performance optimization

LANGUAGES

FRENCH

Native

ENGLISH

Professional Working Proficiency

KOREAN

Currently Studying
